## Singapore Hockey Federation (SHF) School PE Programme

This partnership programme aims to use modified hockey in the PE curriculum of students, in line with the recommendation of the Ministry of Education to focus on Fundamental Movement Skills incorporating movement concepts of body awareness, space awareness, effort and relationships, taught across the activity areas of athletics, dance, games, and sports.

This PE programme consist of 4 modules, with 5 lesson plans in each module (20 lessons), from simple beginner to moderate levels, suitable for students from 9 to 12 years of age.

- The lessons cover a range of tasks and games to provide physical activity that is interesting to prepare them for the modified game.
- The lessons also aim to teach core values of respect, responsibility, resilience, integrity, care and harmony during game play.

### THE MODIFIED HOCKEY GAME

Students play a 3 v 3 hockey with modified equipment, 2 to 4 goalposts, without goalkeepers in a smaller play area. During game play, students execute skills of advancing with the ball, passing and shooting, moving into space to receive the ball and a combination of these skills, to defend and attack, to perform intended outcomes. Students demonstrate some control when dribbling and passing to set up opportunities for themselves and teammates to shoot at goal when attacking. They generally adjust their positions to maintain frontal view of the goal post when attacking and place themselves between the attacker and goal post when defending. In attacking the goal, students make good use of available space by dribbling into space or passing to unmarked teammates. In defending the goal, students work together to stop the attack and regain possession of the ball.

### AIMS DURING THE GAME INCLUDE:

1. Execution of basic skills to attack and defend
2. Demonstration of strategy development and cooperation
  - Setting of opportunities for themselves and teammates to score a goal
  - Making good use of available space by dribbling into space or passing to unmarked teammates
  - Working together to stop an attack and regain possession of the ball
  - Players generally adjust their positions to maintain frontal view of the goal post when attacking and place themselves between the attacker and goal post when defending.

### RULES

#### *3 important rules:*

1. Safety always comes first

#### Facilities and Equipment

- Recommended size of play area: Length – 14 to 18 m, Width – 8 to 10 m

- Recommended venue: Indoor court or outdoor field

- Recommended size of goalpost\*: Length – 1.2m to 3.5m, Height – 0.6 to 1.15 m. (*Modified goalposts using cones or bean bags placed 1.2 m apart for each goalpost may be used*)

## CONTENT / TEACHING POINTS

**TASK 1: 3 CHANNEL PASSING** (15 min)

- 1 stick per student and 1 ball for every 3 students
- 20 students per play area to form 3 lines per playing area

- This is repeated till the end of the line, run back to join the other line and restart
- Play for 10 min, rest 2 min and repeat

Note to Trainer:

- Face forward along the line while dribbling. Do not run sideways (**‘crabbing’**)
- The ball to be passed to a suitable distance in front of the receiver so the ball can be received in front ahead of the run to maintain the momentum
  - Students in left channel will have to rotate their upper body clockwise to pass the ball while feet remain facing (**and running forward**)

**TASK 2: 3 CHANNEL PASSING WITH PASSIVE DEFENDER AND SHOT ON GOAL** (20 min)

  - Play for 10 min, rest 2 min and repeat

Note to Trainer:

- The defender should start with both hands on the stick, feet shoulder width apart, knees bent with left foot leading. The stick head should be grounded. When there is an opportunity to jab, the stick should be transferred to the left hand and the player should "jab" at the ball, keeping the stick head grounded. The player should return to a two handed grip after the jabbing action is complete

**TASK 2: CHANNELING WITH PASSIVE/ACTIVE DEFENDER** (20 min)
 

- 1 stick per student and 1 ball per pair of students
- Defender will use his body and position to channel the ball carrier towards the sideline.

Note to Trainer:

- The ball carrier will dribble towards the goal and the defender will position himself between the goal and the ball carrier, forcing the ball carrier to dribble away from the goal.
- The defender keeps shadowing the ball carrier (**1 stick length away**), keeping his body between the goal and the ball carrier thus channeling or herding the ball carrier towards the sideline.

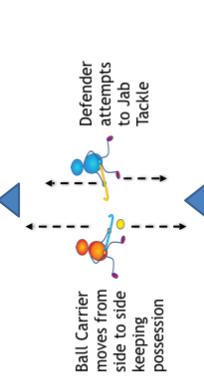

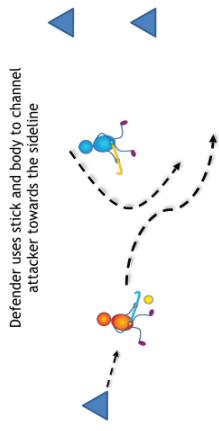

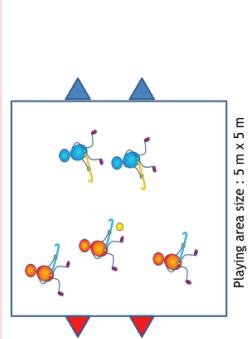

- If the defender is active, he may attempt a jab tackle or block tackle if the opportunity presents itself.
- Play for 10 min, rest 2 min and repeat
